

BreakThru Testimonials

"Awesome! Treats you like a human patient not a addict! Thank you!"

"The Breakthrough program is a very important tool to battle addiction, overdose and death in our community. It is truly a blessing and a necessity. Thanks for everything guys!"

"After 8 years of being prescribed pain medication for my back, I decided that I was tired of the never ending regimen of medication. I decided to go through withdrawals at home. I soon realized that I couldn't do it alone so I went to the ER. The ER transferred me to their psychiatric department where I felt unsafe, uncomfortable, and almost like a criminal. After calling my physician, I was admitted to BreakThru at my community hospital. I was treated just like every other patient and after three days was then referred to long term treatment. I don't know who's happier, me or my wife!"

"I really had a wonderful staff that took really good care of me and if I asked for something they always bring it to me. I am so appreciative to everyone here for helping me get through this and they are right along side with you when you go through withdrawals. I am so thankful for everyone that's here."

If you or someone you know is suffering from addiction or substance abuse issues, please contact BreakThru at Reynolds Memorial Hospital.

(304) 860-5046

Covered by most insurance carriers, Medicaid and Medicare. Other financing options are available.

**Medical Withdrawal Management
at Reynolds Memorial Hospital**

*Addiction is a disease.
It needs to be treated like one.*

REYNOLDS MEMORIAL HOSPITAL

BreakThru's Unique Advantage

BreakThru is a substance use and/or abuse service located within Reynolds Memorial Hospital. Clients who are in withdrawal from alcohol and/or drugs are medically stabilized and managed on a medical/surgical unit, just like any other patient recovering from surgery or other medical conditions, preserving dignity and confidentiality.

Using a multidisciplinary team approach, withdrawal symptoms and medical comorbidities are medically managed throughout the withdrawal period, ensuring safe and effective medical outcomes.

We offer an innovative medical collaboration between the hospital and community referral partners so that we can establish a personalized aftercare discharge plan. Clients are then followed for one year to determine recovery outcomes.

BreakThru is devoted to focusing on integrity and quality to create a healthier and better life for those impacted by substance use and/or abuse.

BreakThru Keys to Success

- Provide a safe withdrawal
- Reduce immediate withdrawal symptoms
- Prevent complications
- Provide withdrawal management that preserves the patient's dignity
- Establish immediate aftercare discharge plan
- Measure patient outcomes

BreakThru Provides

- Safe, comfortable, private and confidential hospital stay on a medical/surgical unit, just like any other patient recovering from surgery or other medical conditions.
- Provide the safest environment for withdrawal from alcohol and/or drugs.
- Treatment plans administered based on each individual's substance of choice and medical history to promote comfort, prevent complications and alleviate pain using evidence-based treatment.
- Exceptional 24-hour care administered by highly skilled providers and nurses with a lower nurse-to-patient ratio than other treatment facilities.
- An immediate aftercare discharge plan for each patient is established in the continuum of care for successful remission or recovery.
- BreakThru staff will follow up with all patients at one-, three-, six- and twelve-month intervals to determine level of remission, sobriety and engagement in treatment to measure patient outcomes.

"We must help everyone see that **addiction is not a character flaw** – it is a chronic illness that we must approach with the same skill and compassion with which we approach heart disease, diabetes, and cancer."

- Vivek H. Murthy, M.D., M.B.A.

Surgeon General of the United States, 2014-2017
